WORK EXPERIENCE

SOFTWARE ENGINEER

BMA (Bowland/Fastrax/Headpinz) – 2020 to 2022 (CURRENT)

- Developed and maintained client's and internal websites using Python, JavaScript, HTML, CSS.
- Troubleshoot and debug web app related issues, replying to and completing issues in a timely manner.

REPORTING ANALYST

Alorica – 2019 to 2020

- A large part of the role was developing and fixing SQL queries for upper management and our reporting software.
- Super detail oriented position as management and others would be making critical business decisions based on the SQL statements I wrote.

PORTFOLIO PROJECTS

MUSIC PLAYER - C# BACK-END WITH A REACT FRONT-END

- Developed a web-based music player to showcase my C# back-end skills.
- Stack Utilized: C#, .NET 5, ASP.NET Web API's, React, SQLite
- Public URL: TO DO
- GitHub URL: TO DO
